

The Barnacle (TM) by Bilge Saver is an electronic switch designed to replace float switches for centrifugal bilge pumps.*

Barnacle Features:

- No moving parts at all
- 3 wire installation between battery and pump, anywhere on the boat
- Completely encased and sealed to resist any marine corrosion.
- Can be attached by hanging or screwing.
- Indicator light signals on/off, standby, pump jam, low voltage, or time-setting mode
- Barnacle has adjustable timing for the water check interval: 10 second check, 30 second check (default), 60 second check.

*Barnacle has been tested on centrifugal pumps from 500 gph - 2,000gph and is interchangeable without calibration.
